

seeking to organize a nationwide network paging service. The Public Notice will provide complete details regarding application requirements and procedures.

(b) [Reserved]

(c) *Affiliated local carriers.* Parties seeking to become affiliated local carriers in a nationwide network paging service must have specific completed contracts with the network organizer with which they are proposing to affiliate. Applications may contain a letter, in lieu of the contracts, indicating that the applicant has a completed contract with the organizer.

(d) *Liability for technical operation.* Nationwide network organizers and affiliated local carriers are jointly and severally liable for the technical operation of the local network stations.

§ 22.559 One-way paging application requirements.

In addition to information required by Subparts b and d of this part and § 22.529, applications for authorization to operate a paging transmitter on the channels listed in § 22.531 must contain the applicable supplementary information described in this section.

(a) *Interference exhibit.* Except as provided in paragraph (b) of this section, an exhibit demonstrating compliance with § 22.537 with regard to protected transmitters is required for applications to operate a transmitter on the VHF channels. This exhibit must:

(1) Identify each protected transmitter located within 109 kilometers (68 miles) of the proposed transmitter in directions in which the distance to the interfering contour is 76.5 kilometers (47.5 miles) or less, and within 178 kilometers (111 miles) of the proposed transmitter in directions in which the distance to the interfering contour exceeds 76.5 kilometers (47.5 miles).

(2) For each protected transmitter identified, show the results of distance calculations indicating that there would be no overlap of service and interfering contours, or alternatively, indicate that the licensee or applicant for the protected transmitter and/or the applicant, as required, have agreed in writing to accept any interference resulting from operation of the proposed transmitter.

(b) *Encompassment exhibit.* An exhibit showing that the area within the interfering contour of the proposed transmitter would be totally encompassed by interfering contours of operating co-channel base transmitters controlled by the applicant is required for applications to operate a transmitter with ERP exceeding the basic power and height-power limits of § 22.535. For VHF transmitters, this encompassment exhibit may substitute for the interference exhibit required in paragraph (a) of this section.

ONE-WAY OR TWO-WAY MOBILE OPERATION

§ 22.561 Channels for one-way or two-way mobile operation.

The following channels are allocated for paired assignment to transmitters that provide (or support other transmitters that provide) one-way or two-way public land mobile service. These channels may be assigned for use by mobile or base transmitters as indicated, and to fixed transmitters (including control, repeater or other fixed transmitters). The mobile channels may also be assigned for use by base or fixed transmitters under certain circumstances (see § 22.567(h)). Unless otherwise indicated, all channels have a bandwidth of 20 kHz and are designated by their center frequencies in Mega-Hertz.

Base	Mobile	Base	Mobile
